

Recopier et calculer les produits suivants comme sur l'exemple.

Exemple :

$$9 \times \frac{8}{7} = \frac{9 \times 8}{7} \\ = \frac{72}{7}$$

$9 \times \frac{10}{6} = \dots\dots\dots$

$10 \times \frac{5}{6} = \dots\dots\dots$

$12 \times \frac{7}{19} = \dots\dots\dots$

$6 \times \frac{20}{10} = \dots\dots\dots$

$9 \times \frac{3}{9} = \dots\dots\dots$

$9 \times \frac{9}{4} = \dots\dots\dots$

$8 \times \frac{17}{14} = \dots\dots\dots$

$10 \times \frac{19}{4} = \dots\dots\dots$

$5 \times \frac{7}{7} = \dots\dots\dots$

$9 \times \frac{6}{4} = \dots\dots\dots$

$12 \times \frac{7}{14} = \dots\dots\dots$

$14 \times \frac{1}{19} = \dots\dots\dots$

$4 \times \frac{4}{2} = \dots\dots\dots$

$5 \times \frac{8}{1} = \dots\dots\dots$

$12 \times \frac{5}{19} = \dots\dots\dots$

$13 \times \frac{3}{16} = \dots\dots\dots$

$5 \times \frac{2}{3} = \dots\dots\dots$

$7 \times \frac{9}{3} = \dots\dots\dots$

$16 \times \frac{20}{15} = \dots\dots\dots$

$12 \times \frac{7}{11} = \dots\dots\dots$
