

Recopier et calculer les produits suivants comme sur l'exemple.

Exemple :

$$\begin{aligned} 9 \times \frac{8}{27} &= \frac{9 \times 8}{27} \\ &= \frac{9 \times 8}{9 \times 3} \\ &= \frac{8}{3} \end{aligned}$$

$8 \times \frac{16}{56} = \dots\dots\dots$	$7 \times \frac{1}{63} = \dots\dots\dots$	$4 \times \frac{2}{16} = \dots\dots\dots$	$4 \times \frac{2}{8} = \dots\dots\dots$
$6 \times \frac{3}{54} = \dots\dots\dots$	$9 \times \frac{4}{54} = \dots\dots\dots$	$10 \times \frac{1}{90} = \dots\dots\dots$	$6 \times \frac{19}{36} = \dots\dots\dots$
$8 \times \frac{7}{64} = \dots\dots\dots$	$7 \times \frac{7}{7} = \dots\dots\dots$	$3 \times \frac{13}{15} = \dots\dots\dots$	$2 \times \frac{11}{4} = \dots\dots\dots$
$5 \times \frac{13}{40} = \dots\dots\dots$	$6 \times \frac{18}{30} = \dots\dots\dots$	$4 \times \frac{7}{12} = \dots\dots\dots$	$1 \times \frac{8}{7} = \dots\dots\dots$
$8 \times \frac{13}{72} = \dots\dots\dots$	$6 \times \frac{14}{24} = \dots\dots\dots$	$2 \times \frac{8}{10} = \dots\dots\dots$	$5 \times \frac{16}{5} = \dots\dots\dots$
