

A diagram consisting of a central circle. Inside the circle, on the left side, is a multiplication symbol (\times). To the right of the multiplication symbol is a fraction with the number 100 in the numerator and 890,98 in the denominator. A horizontal line separates the numerator and denominator. Two curved arrows originate from the top and bottom of the circle and point to the left, extending beyond the left edge of the frame.

$$\times \frac{100}{890,98}$$
